

■ VIDEO STUDIO FOR BRANDS ON X

Videos made for the **X timeline.**

For Crypto brands · Products · AI products · overlapx.com

A video studio for brands that market on X.

Motion graphics, AI films and hype edits for crypto brands, products and AI companies. Built to stop the scroll, delivered in 4-5 days, and you only pay once you love it.

Pay when you love it

Nothing upfront. You pay 100% once the video is right.

Delivered in 4-5 days

From brief to final cut in under a week.

Every format

16:9, 1:1, 9:16 and 4:5, ready for X and everywhere else.

Refined until perfect

We keep iterating until you call it done.

X isn't YouTube. We edit for the scroll.

01

The first second decides

On X the video autoplays mid-scroll. We open on the hook, never on a logo sting, so people stop before they decide to.

02

Sound is off

The timeline autoplays muted. Motion and on-screen type carry the story; audio is the bonus, not the message.

03

Built for the feed

Framed and paced for how the timeline crops, loops and autoplays, in every aspect ratio you need.

04

Fluent in crypto and AI

Launches, mainnets, token events, product drops. We know the audience and the language, so it lands without the cringe.

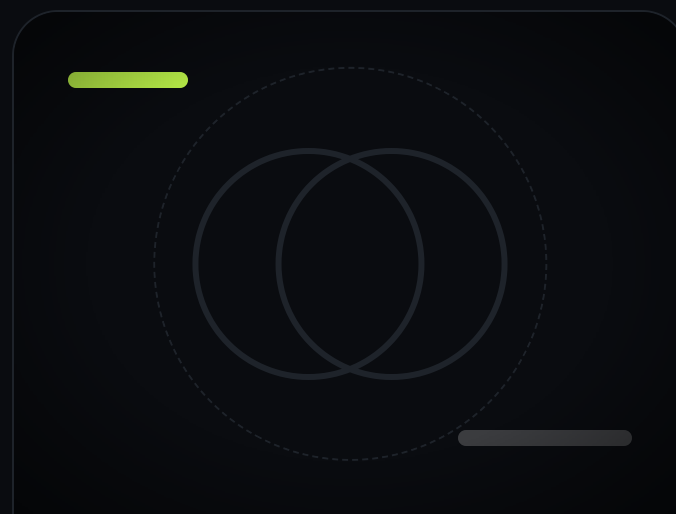

Every style the timeline rewards.
